Aquaponics Algae: How to Control, Combat and Get Rid of Algae in Aquaponics System By Timothy Tripp

Aquaponics is one of several alternative food growing techniques that are being embraced by food growers worldwide. An aquaponic growing system that combines aquaculture (where growers raise aquatic animals such as snails and fish in tanks) and hydroponics (the process of raising plants in water and growing them without the use of soil). In this system of food growing, the water from the aquaculture portion of the system is fed into the hydroponic system. From there by-products are broken down by the nitrates and nitrites in plants, used as nutrients, and then re-circulated back into the system. Aquaponic gardening and farming enables growers to raise healthy food sources while preserving natural resources and the surrounding environment. Despite the many advantages this food production systems gives growers, there are several challenges that growers face in maintaining a healthy aquaponic growing system. A major concern that growers using this food production system need to address is the presence of algae. The presence of algae can have serious repercussions in the health and vitality of all organisms in an aquaponic grow system.

Editorial Review

About the Author

Timothy Tripp is a published author who specializes on gardening and farming topics. Gardening is the passion of his life and he enjoys all aspects of it. For Timothy gardening is a an endless source of inspiration as well as the way of relaxing. He thinks that garden is like a painting and it is up to you how well you paint it. Besides gardening Timothy also has a big interest in farming related topics. Timothy wrote books on various gardening subjects including container gardening, vertical gardening, herb gardening, raised bed gardening, aquaponics and other. In his books he focuses on giving quality and actionable information to the actual readers. Timothy thinks that being a gardener is much more than just planting and maintaining plants it is also a way of living and expressing your attitude to the world. He thinks that gardening is one of the most delightful experiences that exist.

Users Review
