**Construction Equipment Management for Engineers, Estimators, and Owners (Civil and Environmental Engineering)** By Douglas D. Gransberg, Calin M. Popescu, Richard Ryan

Based on the authors' combined experience of seventy years working on projects around the globe, *Construction Equipment Management for Engineers, Estimators, and Owners* contains hands-on, how-to information that you can put to immediate use. Taking an approach that combines analytical and practical results, this is a valuable reference for a wide range of individuals and organizations within the architecture, engineering, and construction industry.

The authors delineate the evolution of construction equipment, setting the stage for specific, up-to-date information on the state-of-the-art in the field. They cover estimating equipment ownership, operating cost, and how to determine economic life and replacement policy as well as how to schedule a production-driven, equipment-intensive project that achieves target production rates and meets target equipment-related unit costs and profits. The book includes a matrix for the selection of equipment and identifies common pitfalls of project equipment selection and how to avoid them. It describes how to develop an OSHA job safety analysis for an equipment-intensive project, making this sometimes onerous but always essential task easier.

The authors' diverse and broad experience makes this a book that ranges from the rigorous mathematical analysis of equipment operations to the pragmatic discussion of the equipment maintenance programs needed to guarantee that the production predicted in a cost estimate occurs.

## **Editorial Review**

## **Users Review**

### **From reader reviews:**

#### **Bob Pratt:**

Have you spare time for just a day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a wander, shopping, or went to the particular Mall. How about open or read a book entitled Construction Equipment Management for Engineers, Estimators, and Owners (Civil and Environmental Engineering)? Maybe it is to get best activity for you. You know beside you can spend your time with your favorite's book, you can cleverer than before. Do you agree with its opinion or you have other opinion?

#### **Robert Carlson:**

What do you think about book? It is just for students since they're still students or it for all people in the world, what the best subject for that? Only you can be answered for that query above. Every person has several personality and hobby for every single other. Don't to be forced someone or something that they don't desire do that. You must know how great in addition to important the book Construction Equipment Management for Engineers, Estimators, and Owners (Civil and Environmental Engineering). All type of book is it possible to see on many resources. You can look for the internet sources or other social media.

#### **Shellie Toy:**

In this period globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. Often the book that recommended to you personally is Construction Equipment Management for Engineers, Estimators, and Owners (Civil and Environmental Engineering) this publication consist a lot of the information from the condition of this world now. This specific book was represented just how can the world has grown up. The terminology styles that writer use for explain it is easy to understand. Often the writer made some analysis when he makes this book. That is why this book suitable all of you.

#### **Joshua Parsons:**

That e-book can make you to feel relax. This kind of book Construction Equipment Management for Engineers, Estimators, and Owners (Civil and Environmental Engineering) was vibrant and of course has

pictures on there. As we know that book Construction Equipment Management for Engineers, Estimators, and Owners (Civil and Environmental Engineering) has many kinds or type. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and believe that you are the character on there. So , not at all of book usually are make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading in which.
