Exquisite Modular Origami II (Volume 2) By Meenakshi Mukerji

This is a step by step how-to book for making modular origami models based on polyhedra. It seems like there are myriad modular origami designs out there these days; anything that joins goes. However, in this book, Meenakshi Mukerji's sixth, she still has much more to offer, with the designs presented some of her best yet. After a successful Exquisite Modular Origami, this second volume is a natural follow up. Handpicked by the author, the models are not only beautiful, but have been subjected to rigorous design criteria such as sturdiness of the locking mechanism, easy starting paper proportions, mostly squares, and absence of inserts or separate joining units. The aesthetic appeal lies in clean well defined lines.

The designs are all-new and like before, works of three new, very creative guest artists have been included as well. In grayscale, the book is practically a bargain because it is as effective as folding from a color book. Color photos of most designs are on the cover for your viewing pleasure. Just when you think you are running out of satisfying modular origami to fold, here now you have dozens more exciting new ones to enjoy. Do visit the author's popular website www.origamee.net for more ideas and color photos.

Editorial Review

About the Author

Meenakshi Mukerji (Adhikari) was introduced to origami in early childhood. She rediscovered origami in its modular form as an adult quite by chance in 1995. This newfound mathematical and structural side of modular origami rekindled her passion for the art, and soon after, she started designing and displaying origami on her popular website origamee.net.

In 2005, OrigamiUSA noticed Meenakshi's work and presented her with the Florence Temko award. In April 2007, her first book *Marvelous Modular Origami* was published followed in quick succession by four more books. She has been a featured artist and special guest at many origami conventions both in the USA and abroad. Although known for modular designs, she has published a book of her single sheet works as well. Meenakshi regularly contributes to various origami journals and exhibits her work as well. She is a member of Origami USA and British Origami Society, and an editor for OrigamiUSA's online magazine, *The Fold*.

Born and raised in Kolkata, India, Meenakshi obtained her BS in electrical engineering from the Indian Institute of Technology, Kharagpur, and a MS in computer science from Portland State University, Oregon. She worked as a software engineer for more than a decade. She is now at home in California devoting her time to family, designing and authoring origami and, of course, spreading the joy of origami.
