Pro SharePoint 2010 Solution Development: Combining .NET, SharePoint, and Office 2010 (Expert's Voice in Sharepoint)

By Ed Hild, Chad Wach

Pro SharePoint 2010 Solution Development: Combining .NET, SharePoint, and Office 2010 (Expert's Voice in Sharepoint) By Ed Hild, Chad Wach

This book takes a practical problem-solution approach to common business challenges. You'll not only encounter interesting code samples, but also see how to combine these examples with the Microsoft collaboration platform's services. The book's solutions focus on using Visual Studio 2008 and its built-in Office development tools to construct the user interface layer. And solutions can interact with SharePoint as a service provider, taking advantage of SharePoint's many collaboration features like document repositories, collaboration sites, and search functions.

This book is unique because it starts with challenges that end users deal with every day when using the Microsoft collaboration platform to support business processes. The solutions are presented as hypothetical business challenges of a fictional company. By presenting the examples in this context, author **Ed Hild** makes it easier to relate to the challenges and solution value. The goal of these examples is to build applications that apply the benefits of the Office desktop interface to the richness of SharePoint collaboration features. This book will help you develop real-world solutions to complex business problems and challenges.

Editorial Review

About the Author
Ed Hild's first job after college was as a math and computer science teacher at Walt Whitman High School in Bethesda, Maryland. After upgrading the curriculum, he decided to practice what he was teaching and moved into consulting. Ed soon felt the teaching itch again, and took a position teaching MCSD and MCSE courses for a technical education center as well as developing the software that would run the franchise. Ed gained most of his development experience at his next position as director of technology at e.magination, a Microsoft partner in Baltimore. There, he worked for several years building web applications for a wide variety of customers using Microsoft technologies. He was then lured to Microsoft and now works as the collaboration technology architect in the Microsoft Technology Center in Reston, Virginia.

Users Review

From reader reviews:

Catherine Williams:

Do you have something that you like such as book? The reserve lovers usually prefer to opt for book like comic, short story and the biggest some may be novel.
