Understanding Construction Drawings By Mark W. Huth

Updated to the 2006 International Building and Residential Codes, the fifth edition of **UNDERSTANDING CONSTRUCTION DRAWINGS** continues to highlight a range of real construction projects - from residential dwellings to commercial structures. This enhanced edition combines information and a hands-on approach to learning. The text provides thorough coverage that builds the foundation for a broad understanding of the entire construction process. The book begins with a simple duplex home that focuses readers on the fundamentals of views, lines, basic dimensioning, and symbols. Next, coverage of a multi-level single family home goes into more depth in orienting and cross-referencing drawings. The third section explores multifamily construction and is accompanied by more complex drawings for practice and more advanced interpretations. The final portion of the book introduces students to elements of commercial construction, including structural steel, masonry, and reinforced concrete. An extensive set of drawings packaged with the book illustrates each building so that students can apply important skills and gain a "real-world" understanding of construction drawings in an engaging way.

About the Author

Mark Huth is a former editor at Delmar Cengage Learning, a role that took him inside hundreds of classrooms and allowed him to glean the best teaching methods for his students and readers. He travels extensively throughout North America, gaining first-hand knowledge of construction methods and materials. In addition to **BASIC PRINCIPLES FOR CONSTRUCTION**, he is the author of several other respected texts on construction principles, technology, and mathematics. Mr. Huth has also taught high school building construction and worked as a professional carpenter and subcontractor. He holds a master of science degree in curriculum and instruction, as well as permanent certification in building construction from the New York State Education Department.

Users Review

From reader reviews:

Cindy Martin:

What do you concentrate on book? It is just for students since they are still students or the item for all people in the world, the particular best subject for that? Just simply you can be answered for that problem above. Every person has various personality and hobby for every single other.
