**Great Formulas Explained - Physics, Mathematics, Economics** By Metin Bektas

In this book you will find some of the greatest and most useful formulas that the fields of physics, mathematics and economics have brought forth. Each formula is explained gently and in great detail, including a discussion of all the quantities involved and examples that will make clear how and where to apply it. On top of that, there are plenty of illustrations that support the explanations and make the reading experience even more vivid.

The book covers a wide range of topics: acoustics, explosions, hurricanes, pipe flow, car traffic, gravity, satellites, roller coasters, flight, conservation laws, trigonometry, equations, inflation, loans, and many more. From the author of "Physics! In Quantities and Examples" and "Introduction to Stars: Spectra, Formation, Evolution, Collapse".

Volume II is now available under the title "More Great Formulas Explained".
