Minerals and Coal Process Calculations By D.V. Subba Rao

The aim of process calculations is to evaluate the performance of minerals and coal processing operations in terms of efficiency of the operation, grade of the final products and recovery of the required constituents. To meet these requirements, in-depth detailed calculations are illustrated in this book.

This book is designed to cover all the process calculations. The method and/or steps in process calculations have been described by taking numerical examples. Process calculations illustrated in a simple and self explanatory manner based on two basic material balance equations will allow the reader to understand the contents thoroughly.

Inclusion of elaborate process calculations in every chapter is the highlight of this book. This book is unique and devoted entirely to the process calculations with sufficient explanation of the nature of the calculations. This book will prove useful to all: from student to teacher, operator to engineer, researcher to designer, and process personnel to plant auditors concerned with minerals and coal processing.

Editorial Review

Review

"This book is a vital asset and first of its kind in process calculations. This book meets the requirement of technocrats and engineers who are pursuing the advance studies and research."

Om Prakesh, General Manager - Engineering, Metso India Pvt Ltd.

About the Author

Dr. D.V. Subba Rao is retired associate professor and head of the department of Mineral Beneficiation at S. D. S. Autonomous College, (India). He has 32 years of experience at S. D. S. Autonomous College and presently serves as a guest faculty in the department of Mining Engineering at GIET, India. He has published multiple books on mineral beneficiation and has been member and chairman of academic bodies such as BOS in Mineral Beneficiation, BOS in Materials Handling and BOS in Applied Chemistry as well as the academic council and governing body of S. D. S. Autonomous College.

Users Review

From reader reviews:

Johnny Cervantes:

The book Minerals and Coal Process Calculations will bring you to the new experience of reading the book. The author style to elucidate the idea is very unique. In the event you try to find new book to read, this book very appropriate to you. The book Minerals and Coal Process Calculations is much recommended to you you just read. You can also get the e-book from your official web site, so you can quickly to read the book.

Gregory Mendoza:

Are you kind of stressful person, only have 10 as well as 15 minute in your morning to upgrading your mind talent or thinking skill possibly analytical thinking? Then you are receiving problem with the book as compared to can satisfy your limited time to read it because all this time you only find e-book that need more time to be study. Minerals and Coal Process Calculations can be your answer mainly because it can be read by you actually who have those short time problems.

Todd Jacob:

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you can have it in e-book method, more simple and reachable. This particular Minerals and Coal Process Calculations can give you a lot of buddies because by you checking out this one book you have thing that they don't and make you actually more like an interesting person. This specific book can be one of a step for you to get success. This guide offer you information that might be your friend doesn't understand, by knowing more than additional make you to be great individuals. So , why hesitate? Let me have Minerals and Coal Process

Calculations.

Adam Cohn:

That publication can make you to feel relax. That book Minerals and Coal Process Calculations was colourful and of course has pictures on there. As we know that book Minerals and Coal Process Calculations has many kinds or category. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and feel that you are the character on there. So , not at all of book usually are make you bored, any it offers up you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading in which.
