Neuropsychology of Cancer and Oncology (Contemporary Neuropsychology) By Chad Noggle PhD ABN

"This book, in both its direct and indirect inferences, points to the need for disease-specific neurocognitive methods in broadly occurring CNS and non-CNS cancers... All in all, this is a beautifully conceptualized book that should be on the bookshelves of many specialists who work in the very challenging field of Oncology."--**Carol L. Armstrong, PhD, Children's Hospital of Pennsylvania, Archives of Clinical Neuropsychology**

Interest in the neurocognitive and sensory impairments resulting from many cancers and their interventions has grown considerably over the past decades as an important aspect of quality of life issues for cancer patients and survivors. *The Neuropsychology of Cancer and Oncology* features current findings on the neuropsychological effects of these cancers and their treatments along with the most promising neuropsychological and behavioral health interventions available to mitigate these deficits. This edited volume, part of the Contemporary Neuropsychology series, bridges the gap between the knowledge of neuropsychologists, who are grounded in the biological and physiological bases of cognition and behavior but not in pathology, and that of oncologists, who often lack expertise in the neuropsychological aspects of cancer.

This text first addresses the biological components and medical care of these cancers, and issues relating to bioimaging. It then discusses the neurological impact of these cancers as they affect different functions, such as memory, learning, and sensory-motor ability, as well as discusses the effects of childhood cancers on neurological development. State-of-the-art neuropsychological and behavioral health interventions are considered, including neuropsychological/cognitive rehabilitation and habituation, pharmacological interventions, and collaborative medical practices. This text is a unique and timely resource for clinical neuropsychologists, clinical psychologists, neurologists, oncologists, oncology nurses, and neurorehabilitation professionals.

Key Features:

- Bridges the gap of knowledge between neuropsychologists and oncologists
- Explores the most current research on the neuropsychological effects of various cancers and their treatments
- Provides state-of-the-art information on promising neuropsychological and behavioral health interventions for impairments created by cancers and their treatments
- Represents a collaboration between some of the foremost scholars and practitioners in neuropsychology and oncology

About the Author

Chad A. Noggle, PhD, is Assistant Professor of Clinical Psychiatry at Southern Illinois University School of Medicine. He completed an internship in Neuropsychology through the BSU Consortium and a two-year post-doctoral residency at the Indiana Neuroscience Institute at St. Vincent's Hospital with specialization in Pediatric and Adult/Geriatric Neuropsychology. He is co-editor of *The Encyclopedia of Neuropsychological Disorders*, also to be published through Springer Publishing Company as well as the co-editor of the *Contemporary Neuropsychology* series. To date, Dr. Noggle has published more than 200 articles, book chapters, encyclopedia entries, and research abstracts and has made over 80 presentations at national and international conferences in neuropsychology. He currently serves as a reviewer for a number of neuropsychology journals. Dr. Noggle is a member of the American Psychological Association (Divisions 40, 5, & 16), National Academy of Neuropsychology, and International Neuropsychological Society. He is a licensed Psychologist in both Illinois and Indiana.||Raymond S. Dean, PhD, is Past President of the Clinical Neuropsychology Division of the APA and the National Academy of Neuropsychology. He has been the George and Frances Ball Distinguished Professor of Neuropsychology and Director of the Neuropsychology Laboratory at Ball State University since 1984. As a Paracheck-Frazier Research Fellow, he completed a Ph.D. in School/Child Clinical Psychology at Arizona State University in 1978. Dr. Dean completed an

internship focused on neuropsychology at the Arizona Neuropsychiatric Hospital and postdoctoral work at the University of Wisconsin at Madison. He has been awarded the Lightner Witmer Award by the School Psychology Division of the American Psychological Association and both the Outstanding Contribution Award from the National Academy of Neuropsychology and the Early Contribution Award by Division 15 of the APA. In addition to his academic appointments, Dr. Dean served as Distinguished Visiting Faculty at the Staff College of the NIMH. He is a Diplomate of the American Board of Professional Psychology, the American Board of Professional Neuropsychology, and the American Board of Pediatric Neuropsychology. He is a Fellow of the American Psychological Association (Divisions: Clinical, Educational, School and Clinical Neuropsychology), the National Academy of Neuropsychology, and the American Psychopathological Association. He also served as Editor of the Archives of Clinical Neuropsychology, Journal of School Psychology and the Bulletin of the National Academy of Neuropsychology. Dr. Dean has published some 500 research articles, books, chapters and tests, including the Dean-Woodcock Neuropsychological Assessment System, one of the most important and often-cited neuropsychological assessment batteries. He is co-editor of The Encyclopedia of Neuropsychological Disorders, also to be published through Springer Publishing Company as well as the co-editor of the Contemporary Neuropsychology series. For his work he has been recognized by awards from the National Academy of Neuropsychology, the Journal of School Psychology, and the Clinical Neuropsychology Division of APA.|Dr. Gary Alan Johnson is professor of obstetrics and gynecology and chief of the gynecologic oncology division at Southern Illinois University School of Medicine. He is director of the Gynecologic Oncology Clinic at the SimmonsCooper Cancer Institute at SIU. Previously, he was on the faculty for 15 years at the University of Oklahoma College of Medicine in Oklahoma City, most recently as an associate professor of obstetrics and gynecology and the director and chairman of the palliative care committee. While at Oklahoma, he was awarded numerous teaching awards. He completed his obstetrics and gynecology residency at the University of Wisconsin in Madison (1990), his medical degree at the University of Kansas School of Medicine in Kansas City (1986) and his bachelor's degree in accounting at Washburn University in Topeka, Kan. (1977). He is board certified in obstetrics and gynecology and gynecologic oncology by the American Board of Obstetrics and Gynecology. He has been involved in 30 clinical trials, published more than 40 professional journal articles and has given more than 100 presentations. His research interests include ovarian cancer and palliative care. |Dr. Thomas H. Tarter heads the Section of Urologic Oncology within the Division of Urology at Southern Illinois University School of Medicine. Dr. Tarter earned his PhD degree at the Oregon Health Sciences University School of Medicine, where he studied the interactions of the male reproductive system with the immune system. As a graduate student, he won the New Investigator Award of the American Society of Andrology. He continued his studies as a fellow at the Population Council Center for Biomedical Research on the campus of the prestigious Rockefeller University in New York City. Dr. Tarter attended medical school at the Albany Medical College. After medical school, he completed residency in Urology at the University of Southern California, where he was trained in urologic oncology. Dr. Tarter has practiced urologic surgery in Central Illinois for the past five years with the Carle Clinic Association, where he established a reputation for bladder reconstruction after surgery for bladder cancer, and where he co-founded an interdisciplinary Prostate Cancer Center. Dr. Tarter has received numerous awards for teaching excellence at SIU and published his original, peer-reviewed research in such journals as Journal of Urology, Journal of Andrology, Archives of Andrology, and Biology of Reproduction.|Dr. Rhonda L. Johnson is an assistant professor of psychiatry at Southern Illinois University School of Medicine and chief of the oncology patient and family supportive services division for the Simmons Cooper Cancer Institute at SIU. Johnson previously was an assistant clinical professor of gynecologic oncology at the University of Oklahoma Health Sciences Center (OHSC) in Oklahoma City and a psychologist at the Oklahoma Cancer Institute (2002-08). She completed a one-year fellowship at OHSC (2002) and earned her doctoral degree in counseling psychology from Oklahoma State University (OSU) in Stillwater (2001). She completed her master's degree at the University of Central Oklahoma in Edmond (1997) and her bachelor's at OSU (1975). Johnson has authored more than 15 professional articles and has served as an ad hoc reviewer

for Cancer.

Users Review

From reader reviews:

Gladys James:

Now a day individuals who Living in the era wherever everything reachable by interact with the internet and the resources within it can be true or not involve people to be aware of each info they get. How people have to be smart in acquiring any information nowadays? Of course the reply is reading a book. Reading a book can help people out of this uncertainty Information specifically this Neuropsychology of Cancer and Oncology (Contemporary Neuropsychology) book because book offers you rich info and knowledge. Of course the details in this book hundred percent guarantees there is no doubt in it you know.

Leroy Moore:

Are you kind of stressful person, only have 10 or 15 minute in your morning to upgrading your mind ability or thinking skill possibly analytical thinking? Then you are receiving problem with the book than can satisfy your short space of time to read it because this time you only find book that need more time to be examine.
