## TEXTBOOK OF ENVIRONMENTAL ENGINEERING By P. Venugopala Rao

Designed for a first-course in environmental engineering for undergraduate engineering and postgraduate science students, the book deals with environmental pollution and its control methodologies. The book presents the basic environmental technology in a student-oriented approach. It is interspersed with solved examples and illustrations to reinforce many of the concepts discussed. It also apprises the readers of the current practices in areas of water processing, water distribution, collection and treatment of domestic sewage and industrial waste water, and control of air pollution.

The book will also be useful to the academia of environmental sciences, civil/environmental engineering as well as to environmentalists and administrators working in the field of pollution control
