## Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) From Springer

The theme of the meeting was “Statistical Methods for the Analysis of Large Data-Sets”. In recent years there has been increasing interest in this subject; in fact a huge quantity of information is often available but standard statistical techniques are usually not well suited to managing this kind of data. The conference serves as an important meeting point for European researchers working on this topic and a number of European statistical societies participated in the organization of the event.

The book includes 45 papers from a selection of the 156 papers accepted for presentation and discussed at the conference on “Advanced Statistical Methods for the Analysis of Large Data-sets.”

### Editorial Review

#### From the Back Cover

Many research studies in the social and economic fields regard the collection and analysis of large amounts of data. These data sets vary in their nature and complexity, they may be one-off or repeated, they may be hierarchical, spatial or temporal. Examples include textual data, transaction-based data, medical data and financial time-series. Standard statistical techniques are usually not well suited to manage this type of data and many authors have proposed extensions of classical techniques or completely new methods. The huge size of these data-sets and their complexity require new strategies of analysis sometimes subsumed under the terms “data mining” or “predictive analytics”. This volume contains a peer review selection of papers, whose preliminary version was presented at the international meeting of the Italian Statistical Society “Statistical Methods for the analysis of large data-sets”. It collects new ideas, methods and original applications to deal with the complexity and high dimensionality of data.

#### About the Author

**Agostino Di Ciaccio** and **Mauro Coli** are the former President of the Programme Committee and President of the Organizing Committee, respectively and were involved in the selection of the papers. **Jose Miguel Angulo Ibañez** is the Editor chosen from the Editorial Board of the Series and is President of the SEIO.

### Users Review

#### From reader reviews:

##### **Merideth Davis:**

Book is written, printed, or illustrated for everything. You can learn everything you want by a reserve. Book has a different type. We all know that that book is important factor to bring us around the world. Alongside that you can your reading ability was fluently. A book Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) will make you to be smarter. You can feel much more confidence if you can know about anything. But some of you think in which open or reading a book make you bored. It is not make you fun. Why they are often thought like that? Have you searching for best book or suitable book with you?

##### **Nicole Rockwood:**

This Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) are generally reliable for you who want to become a successful person, why. The main reason of this Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) can be on the list of great books you must have will be giving you more than just simple examining food but feed you actually with information that probably will shock your before knowledge. This book will be handy, you can bring it everywhere you go and whenever your conditions in the e-book and printed versions. Beside that this Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies

in Theoretical and Applied Statistics) giving you an enormous of experience for example rich vocabulary, giving you trial run of critical thinking that we all know it useful in your day action. So , let's have it and luxuriate in reading.

**Carole Clark:**

The book Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) will bring someone to the new experience of reading a book. The author style to elucidate the idea is very unique. If you try to find new book to study, this book very appropriate to you. The book Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) is much recommended to you to see. You can also get the e-book through the official web site, so you can quicker to read the book.

**Marlyn Melia:**

Spent a free the perfect time to be fun activity to perform! A lot of people spent their sparetime with their family, or their own friends. Usually they performing activity like watching television, going to beach, or picnic in the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Might be reading a book is usually option to fill your no cost time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to test look for book, may be the publication untitled Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) can be fine book to read. May be it may be best activity to you.
