Network Defense: Security Policy and Threats (EC-Council Press) By EC-Council

The Network Defense Series from EC-Council | Press is comprised of 5 books designed to educate learners from a vendor-neutral standpoint how to defend the networks they manage. This series covers the fundamental skills in evaluating internal and external threats to network security and design, how to enforce network level security policies, and how to ultimately protect an organization's information. The books in the series cover a broad range of topics from secure network fundamentals, protocols & analysis, standards and policy, hardening infrastructure, to configuring IPS, IDS, firewalls, bastion host and honeypots. Learners completing this series will have a full understanding of defensive measures taken to secure their organization's information, and along with the proper experience these books will prepare readers for the EC-Council Network Security Administrator (E|NSA) certification. Understanding the threats to an organization's infrastructure as well as internal policies and mechanisms used to defend the infrastructure is an integral part to a Network Security Administrator's role. This book, the second in the series, is designed to cover a broad range of topics from a vendor-neutral perspective preparing the Administrator to implement and enforce policies that leverage not only the knowledge of how these threats can materialize, but also the mechanisms used prevent them.

Greg Little:

As we know that book is vital thing to add our expertise for everything. By a book we can know everything we would like. A book is a range of written, printed, illustrated or even blank sheet. Every year had been exactly added. This reserve Network Defense: Security Policy and Threats (EC-Council Press) was filled

regarding science. Spend your free time to add your knowledge about your scientific research competence. Some people has different feel when they reading some sort of book. If you know how big benefit from a book, you can sense enjoy to read a guide. In the modern era like today, many ways to get book you wanted.

Amy Zambrano:

As a university student exactly feel bored in order to reading. If their teacher inquired them to go to the library or even make summary for some book, they are complained. Just small students that has reading's internal or real their hobby. They just do what the educator want, like asked to the library. They go to at this time there but nothing reading very seriously. Any students feel that reading is not important, boring in addition to can't see colorful pics on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Network Defense: Security Policy and Threats (EC-Council Press) can make you truly feel more interested to read.
