Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) By Qiang Lu, Yuanzhang Sun, Shengwei Mei

Nonlinear Control Systems and Power System Dynamics presents a comprehensive description of nonlinear control of electric power systems using nonlinear control theory, which is developed by the differential geometric approach and nonlinear robust control method. This book explains in detail the concepts, theorems and algorithms in nonlinear control theory, illustrated by step-by-step examples. In addition, all the mathematical formulation involved in deriving the nonlinear control laws of power systems are sufficiently presented. Considerations and cautions involved in applying nonlinear control theory to practical engineering control designs are discussed and special attention is given to the implementation of nonlinear control laws using microprocessors.

Nonlinear Control Systems and Power System Dynamics serves as a text for advanced level courses and is an excellent reference for engineers and researchers who are interested in the application of modern nonlinear control theory to practical engineering control designs.

Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) By Qiang Lu, Yuanzhang Sun, Shengwei Mei Bibliography

- Sales Rank: #6200595 in Books
- Brand: Brand: Springer
- Published on: 2001-03-31
- Original language: English
- Number of items: 1
- Dimensions: 9.21" h x .94" w x 6.14" l, 1.63 pounds
- Binding: Hardcover
- 376 pages

Editorial Review

Review

From the reviews:

"This book gives a comprehensive description of nonlinear control of electric power systems using techniques from nonlinear control theory. ... The book is essentially self-contained and can be used as a text for senior undergraduate or graduate engineering students as well as control theory researchers the book should be particularly useful for engineering students is unique and is useful, since it is one of the few that attempt to bridge the gap between the abstract theorems and their engineering implementation." (Amol J. Sasane, Nieuw Archief voor Wiskunde, Vol. 8 (2), 2007)

Users Review

From reader reviews:

Larry Carvajal:

Have you spare time to get a day? What do you do when you have much more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a walk, shopping, or went to the actual Mall. How about open or perhaps read a book entitled Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science)? Maybe it is being best activity for you. You recognize beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with it is opinion or you have various other opinion?

Alice Rodriguez:

Do you have something that you prefer such as book? The publication lovers usually prefer to choose book like comic, limited story and the biggest an example may be novel. Now, why not attempting Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) that give your fun preference will be satisfied by means of reading this book. Reading behavior all over the world can be said as the opportunity for people to know world better then how they react towards the world. It can't be stated constantly that reading practice only for the geeky man or woman but for all of you who wants to always be success person. So , for every you who want to start reading through as your good habit, you could pick Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) become your starter.

Grace Harrell:

Can you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Attempt to pick one book that you find out the inside because don't evaluate book by its deal with may doesn't work is difficult job because you are frightened that the inside maybe not because fantastic as in the outside search likes. Maybe you answer could be Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) why because the wonderful cover that make you consider with regards to the content will not disappoint you. The inside or content is usually fantastic as the outside or maybe cover. Your reading sixth sense will directly assist you to pick up this book.

Misty Ware:

In this time globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. The actual book that recommended for you is Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) this guide consist a lot of the information in the condition of this world now. This specific book was represented how do the world has grown up. The language styles that writer value to explain it is easy to understand. The writer made some investigation when he makes this book. Honestly, that is why this book appropriate all of you.
