Anatomy and Physiology for Speech, Language, and Hearing By J. Anthony Seikel, Douglas W. King, David G. Drumright

This comprehensive text and the accompanying ANIMA 3.0 program on CD-ROM provide an in-depth study of anatomy and physiology for speech, language, and hearing. The text is designed to make anatomy and physiology accessible to the reader without slighting the content. Clinical information is integrated with everyday experiences in an attempt to underscore the relevance of the anatomical material. The text includes bulleted summaries throughout each chapter, study questions, and a pronunciation guide in the glossary to help readers master the material. Analogies and examples are used generously to illustrate the material. This user-friendly text is a must for anyone who wants to really understand the anatomy and physiology as it relates to speech, language, and hearing.

Editorial Review

Review

"It contains detailed descriptions with excellent original drawings which explain the anatomy and physiology of respiration, phonation, and articulation.... This practical and unique teaching package is valuable to students and instructors in communication sciences."

About the Author

J. Anthony (Tony) Seikel, Ph.D., is professor of communication sciences and disorders at Idaho State University in Pocatello, Idaho. His research interests center on the relationship of pathology to acoustics and perception, as well as improving pedagogy through technology. He has recently been studying the relationship between orofunctional disorders and oropharyngeal dysphagia. He earned his B.S. in Speech and Hearing from Phillips University, his M.A. in Speech Pathology from Wichita State University, and a Ph.D. in Speech and Hearing Science from the University of Kansas.

David G. Drumright is a programmer and teacher in Spokane, Washington. He has taught electronics at numerous schools and has a background in speech-language pathology and audiology. His software includes the original ANIMA programs of this text, the new ANATESSE application, AUDIN software for audiology instruction, and several other instructional tools.

Douglas W. King, Ph.D., was a professor within the basic medical program at Washington State University until his death in 2001. He was greatly loved by his students and fellow faculty, and had set up a scholarship program in anatomy for students with diabetes.

Users Review

From reader reviews:

Jonathan Solis:

People live in this new morning of lifestyle always attempt to and must have the spare time or they will get great deal of stress from both day to day life and work.
