**Lecture Notes: Clinical Biochemistry** By Simon W. Walker, Geoffrey J. Beckett, Peter Rae, Peter Ashby

Concise yet comprehensive, *Clinical Biochemistry Lecture Notes* contains all the essential information for students and foundation doctors to understand the biochemical basis of disease and principles of biochemical diagnostics. It presents scientific principles in a clinical setting, with a range of case studies integrated into the text to clearly demonstrate how knowledge should be applied to real-life situations.

Key features include:

- The fundamental science underpinning common biochemical disorders and their investigation in clinical practice
- Accessible flow charts of biochemical processes and the reasoning behind specific tests, making look-up and understanding easy
- A brand new companion website at [www.lecturenoteseries.com/clinicalbiochemistry](http://www.lecturenoteseries.com/clinicalbiochemistry) with self-assessment and downloadable summary slides for revision

*Clinical Biochemistry Lecture Notes* is an ideal overview and revision guide for medical students, foundation doctors, general practitioners, and nurses. It also provides a core text for scientific and medical staff pursuing a career in clinical biochemistry.

## **Editorial Review**

### **Review**

The advantages of this title are that after the first few chapters which cover the basics of Clinical Biochemistry such as 'Requesting and Interpreting tests' and basic acid-base biochemistry, the rest of the text is dedicated to system disorders. From the first chapter of the book, this is a highly patient orientated title with 4 cases in the first chapter on the basics of tests putting what is said into a clinical context. The rest of the chapters are really useful if you want to get your head around specific conditions such as 'Jaundice' and how they are caused at a biochemistry level or you wish to revise the acid-base balance and how this relates to blood gasses.

The disadvantages of this title are that I would have liked to have seen summaries of the key points at the end of each chapter within the print, though this is not essential as should you wish them, they are in part included in the online extras which have both questions & a few notes available for you to utilise.

In conclusion if you are in the first few years of medical school then I would hazard to say that this is one of the best titles available covering clinical biochemistry as unlike many others that I have read in this area & reviewed, it is not padded out with detail that you would not be expected to know at medical school and includes many useful case examples. I would strongly encourage a medical student to see whether this title is in their university library if they don't want to purchase it straight away or look at the online resources which are freely available for the title to see whether it suites your style. (Medical Student, Lancaster University)

### **From the Back Cover**

Concise yet comprehensive, *Clinical Biochemistry Lecture Notes* contains all the essential information for students and foundation doctors to understand the biochemical basis of disease and principles of biochemical diagnostics. It presents scientific principles in a clinical setting, with a range of case studies integrated into the text to clearly demonstrate how knowledge should be applied to real-life situations.

### **Key features include:**

- The fundamental science underpinning common biochemical disorders and their investigation in clinical practice
- Accessible flow charts of biochemical processes and the reasoning behind specific tests, making look-up and understanding easy
- A brand new companion website at [www.lecturenoteseries.com/clinicalbiochemistry](http://www.lecturenoteseries.com/clinicalbiochemistry) with self-assessment and downloadable summary slides for revision

*Clinical Biochemistry Lecture Notes* is an ideal overview and revision guide for medical students, foundation doctors, general practitioners, and nurses. It also provides a core text for scientific and medical staff pursuing a career in clinical biochemistry.

## **Users Review**

### **From reader reviews:**

#### **Shirley Kier:**

In this 21st century, people become competitive in every single way. By being competitive at this point,

people have do something to make these people survives, being in the middle of the particular crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Sure, by reading a publication your ability to survive raise then having chance to stay than other is high. For you personally who want to start reading the book, we give you this kind of Lecture Notes: Clinical Biochemistry book as beginning and daily reading reserve. Why, because this book is more than just a book.

**Rana Jensen:**

A lot of people always spent all their free time to vacation or even go to the outside with them family or their friend. Did you know? Many a lot of people spent many people free time just watching TV, or even playing video games all day long. If you need to try to find a new activity here is look different you can read the book. It is really fun for you. If you enjoy the book which you read you can spent 24 hours a day to reading a guide. The book Lecture Notes: Clinical Biochemistry it is quite good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading this book. When you did not have enough space to develop this book you can buy typically the e-book. You can more quickly to read this book from your smart phone. The price is not very costly but this book has high quality.

**John Almanzar:**

Why? Because this Lecture Notes: Clinical Biochemistry is an unordinary book that the inside of the e-book waiting for you to snap the idea but latter it will zap you with the secret that inside. Reading this book next to it was fantastic author who all write the book in such remarkable way makes the content inside of easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you for not hesitating having this anymore or you going to regret it. This unique book will give you a lot of rewards than the other book possess such as help improving your ability and your critical thinking way. So , still want to postpone having that book? If I ended up you I will go to the publication store hurriedly.

**Jesus Geist:**

A lot of people said that they feel bored stiff when they reading a book. They are directly felt that when they get a half parts of the book. You can choose the book Lecture Notes: Clinical Biochemistry to make your personal reading is interesting. Your current skill of reading expertise is developing when you like reading. Try to choose straightforward book to make you enjoy you just read it and mingle the sensation about book and reading especially. It is to be very first opinion for you to like to wide open a book and examine it. Beside that the book Lecture Notes: Clinical Biochemistry can to be your brand-new friend when you're feel alone and confuse using what must you're doing of these time.
