Editorial Review

From the Back Cover

Statistics is fundamental in the study of pharmaceutical and related sciences. Knowledge of statistics is required to interpret data generated from all types of physical and biological investigations. For example, statistical analysis is applied to the comparison of pharmacological activities of therapeutic agents, the evaluation of the physicochemical properties of dosage forms, and the validation of analytical methods, to name a few. This new book on basic statistics has been specifically written for pharmacy students. It contains chapters on basic concepts such as types of data, graphical representation of data, distribution and standard deviation. More advanced, frequently used, statistical techniques such as ANOVA and the chi-squared test are also discussed using pharmaceutical examples. A series of questions and answers are also given for self-study. Pharmaceutical Statistics is essential reading for all pharmacy students and will also be of interest to those working in the pharmaceutical industry. David Jones is Professor of Biomaterials Science at the School of Pharmacy, Queen's University of Belfast, UK.

Users Review

From reader reviews:

Leopoldo Gonzalez:

In this 21st century, people become competitive in each way. By being competitive right now, people have do something to make these people survives, being in the middle of the crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated this for a while is reading. Yep, by reading a e-book your ability to survive raise then having chance to stay than other is high. For you personally who want to start reading a new book, we give you this specific Pharmaceutical Statistics book as starter and daily reading reserve. Why, because this book is greater than just a book.

Kayla Merritt:

Reading a publication tends to be new life style in this era globalization. With studying you can get a lot of information that could give you benefit in your life. Using book everyone in this world can certainly share their idea. Textbooks can also inspire a lot of people. A lot of author can inspire their reader with their story or perhaps their experience. Not only the storyline that share in the textbooks. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors on this planet always try to improve their expertise in writing, they also doing some analysis before they write to the book. One of them is this Pharmaceutical Statistics.

Eugene Barnum:

People live in this new day time of lifestyle always aim to and must have the free time or they will get wide range of stress from both lifestyle and work. So , once we ask do people have time, we will say absolutely of course. People is human not a robot. Then we question again, what kind of activity do you have when the

spare time coming to anyone of course your answer may unlimited right. Then ever try this one, reading books. It can be your alternative within spending your spare time, the book you have read is actually Pharmaceutical Statistics.

Charles Adams:

Playing with family in the park, coming to see the ocean world or hanging out with friends is thing that usually you might have done when you have spare time, and then why you don't try point that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Pharmaceutical Statistics, it is possible to enjoy both. It is good combination right, you still would like to miss it? What kind of hang type is it? Oh seriously its mind hangout people. What? Still don't obtain it, oh come on its named reading friends.
