Physics, the Human Adventure: From Copernicus to Einstein and Beyond

By Stephen G. Brush, Gerald Holton

This work is the third edition of the classic text Introduction to Concepts and Theories in Physical Science. It has been reworked to further clarify the physics concepts and to incorporate physical advances and research. The book shows the unifying power of science by bringing in connections to chemistry, astronomy and geoscience. In short, the aim of this edition is to teach good physics while presenting physical science as a human adventure that has become a major force in our civilization.

Editorial Review

Review

"Read Holton and Brush to see that there is just one culture, with science playing an integral role." -- -
Sheldon L. Glashow, Nobel laureate, Boston University

From the Back Cover

Physics, the Human Adventure is the third edition of the classic text Introduction to Concepts and Theories in Physical Science. Both earlier editions were landmark titles in science education as the first to make full and effective use of the history and philosophy of science in presenting for both the general and the science-oriented student an account of the content and nature of physical science.

In this third edition, each of the chapters has been reworked to further clarify the physics concepts and to incorporate recent physical advances and research. The book shows the unifying power of science by bringing in connections to chemistry, astronomy, and geoscience. In short, the aim of the new edition is to teach good physics while presenting physical science as a human adventure that has become a major force in our civilization.

About the Author

Gerald Holton is Mallinckrodt Professor of Physics and History of Science, Emeritus, Harvard University. Stephen G. Brush is Distinguished University Professor of the History of Science, University of Maryland, College Park. Both authors are Fellows of the American Physical Society, and each has served as President of the History of Science Society

Users Review

From reader reviews:

Pamela Bradley:

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite e-book and reading a book. Beside you can solve your problem; you can add your knowledge by the e-book entitled Physics, the Human Adventure: From Copernicus to Einstein and Beyond. Try to face the book Physics, the Human Adventure: From Copernicus to Einstein and Beyond as your buddy. It means that it can being your friend when you feel alone and beside that of course make you smarter than in the past. Yeah, it is very fortunated for yourself. The book makes you more confidence because you can know almost everything by the book. So , let us make new experience as well as knowledge with this book.

Eric McDonald:

The guide with title Physics, the Human Adventure: From Copernicus to Einstein and Beyond has lot of information that you can find out it. You can get a lot of gain after read this book. This book exist new knowledge the information that exist in this book represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you inside

new era of the glowbal growth. You can read the e-book on your smart phone, so you can read the item anywhere you want.

William Fuller:

Playing with family within a park, coming to see the ocean world or hanging out with buddies is thing that usually you might have done when you have spare time, and then why you don't try factor that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Physics, the Human Adventure: From Copernicus to Einstein and Beyond, you can enjoy both. It is very good combination right, you still want to miss it? What kind of hang-out type is it? Oh come on its mind hangout guys. What? Still don't obtain it, oh come on its called reading friends.

Kim Salgado:

In this era which is the greater individual or who has ability to do something more are more special than other. Do you want to become one among it? It is just simple way to have that. What you have to do is just spending your time almost no but quite enough to experience a look at some books. Among the books in the top listing in your reading list is Physics, the Human Adventure: From Copernicus to Einstein and Beyond. This book which can be qualified as The Hungry Inclines can get you closer in becoming precious person. By looking upwards and review this publication you can get many advantages.
