In this book, you'll find all the tools, strategies and techniques you need to improve your memory.

Here's just a taste of the memory methods you'll learn in this book:

- The 3 bad habits that keep you from easily remembering important information
- How a simple pattern of thinking can stop you from imprinting and remembering key facts, figures and ideas, and how to break this old pattern so you'll never again be known as someone with a "bad memory"
- How to **master your attention** so you can focus and concentrate longer, even during challenging or stressful situations
- How to use your car to remember anything you want (like long lists or information you need to remember for your studies or personal life) **without writing anything down**
- Simple methods that allow you to nail down tough information or complex concepts quickly and easily
- How to combine your long-term memory (things you already know and will never forget) and short-term memory (information you want to remember right now) to **create instant recall** for tests, presentations and important projects
- The simple, invisible mental **technique for remembering names** without social awkwardness or anxiety
- How using your imagination to bring boring information to life can help you *dramatically improve your attention span and recall*
- An incredible strategy for remembering numbers (the same system Kevin used to remember Pi to 10,000 digits and beat the world memory record by 14 minutes)
- How to use a mental map to **lock in and connect hundreds or even thousands of ideas in your long-term memory** (this method will allow you to become a leading expert in your field faster than you ever dreamed possible)
