Building Cross-Platform Apps using Titanium, Alloy, and Appcelerator Cloud Services By Aaron Saunders

Skip Objective-C and Java to get your app to market faster, using the skills you already have

Building Cross-Platform Apps using Titanium, Alloy, and Appcelerator Cloud Services shows you how to build cross-platform iOS and Android apps without learning Objective-C or Java. With detailed guidance given toward using the Titanium Mobile Platform and Appcelerator Cloud Services, you will quickly develop the skills to build real, native apps—not web apps—using existing HTML, CSS, and JavaScript know-how. This guide takes you step-by-step through the creation of a photo-sharing app that leverages the power of Appcelerator's cloud platform, and establishes fundamental concepts before adding advanced techniques. Coverage extends beyond the development process to include expert advice for deployment on the App Store or Google Play, and more.

The mobile app market is estimated at over \$2.4 billion per year. These apps were traditionally built using Objective-C or Java, which can be complex and daunting to learn. Now you can use JavaScript on the Titanium framework to build amazing apps that run native on iOS and Android devices, and get your app to market faster with this guide.

- Integrate Cloud Services APIs into the app framework and UI
- Set up user accounts, and capture and store photos
- Work with location-based services and share via social media
- Deploy on the App Store, Google Play, and more

When a great idea is in the works, no one wants to put it on hold to learn an entirely new skillset. Now there's an alternative. Get that app to market fast, using existing skills and powerful new tools, and grab a piece of that multi-billion-dollar market. *Building Cross-Platform Apps using Titanium, Alloy, and Appcelerator Cloud Services* is your ticket to the front of the line.

Editorial Review

From the Back Cover

Build robust, native apps without learning Objective-C or Java

Building Cross-Platform Apps using Titanium, Alloy, and Appcelerator Cloud Services shows you how to build cross-platform iOS and Android apps, with no Objective-C or Java required. The Titanium mobile platform and Appcelerator Cloud Services make it possible to build robust, dynamic native apps using existing HTML, CSS, and JavaScript know-how. Step-by-step instruction and expert advice walk you through the process of building a photo-sharing app, providing hands-on learning as you:

- **Get acquainted with Appcelerator Titanium Alloy and the associated cloud services**
- **Capture and store photos and enable sharing between Facebook®, e-mail, and Twitter®**
- **Integrate user accounts, comments, reviews, Friends features, and location-based services**
- **Deploy your app to the App Store and Google Play™ to reach a customer base of millions**

Appcelerator Titanium is an open-source, cross-platform mobile application development framework that allows you to get your app to market fast using existing skills and powerful tools. If you want to tap into the enormous global market, get started with this all-encompassing guide.

You can download the files and code from the companion website at www.wiley.com/go/appcelerator.

About the Author

Aaron Saunders is a former Platform Evangelist for Appcelerator Titanium, providing information and support for Titanium mobile developers. Aaron is the founder and CTO of Clearly Innovative Inc, a digital services agency with offices in Washington, D.C and New York City.

Users Review

From reader reviews:

Joseph Felix:

This Building Cross-Platform Apps using Titanium, Alloy, and Appcelerator Cloud Services book is just not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is information inside this reserve incredible fresh, you will get details which is getting deeper you read a lot of information you will get. This specific Building Cross-Platform Apps using Titanium, Alloy, and Appcelerator Cloud Services without we recognize teach the one who looking at it become critical in imagining and analyzing. Don't always be worry Building Cross-Platform Apps using Titanium, Alloy, and Appcelerator Cloud Services can bring any time you are and not make your carrier space or bookshelves' become full because you can have it in your lovely laptop even mobile phone. This Building Cross-Platform Apps using Titanium, Alloy, and Appcelerator Cloud Services having excellent arrangement in word and also layout, so you will not sense uninterested in reading.

Georgia Hernandez:

As people who live in the particular modest era should be upgrade about what going on or info even knowledge to make these keep up with the era which can be always change and move forward. Some of you maybe will probably update themselves by reading books. It is a good choice for yourself but the problems coming to an individual is you don't know what kind you should start with. This Building Cross-Platform Apps using Titanium, Alloy, and Appcelerator Cloud Services is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and want in this era.

Glenda Rizzo:

Nowadays reading books become more than want or need but also become a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge the actual information inside the book in which improve your knowledge and information. The info you get based on what kind of publication you read, if you want attract knowledge just go with schooling books but if you want feel happy read one having theme for entertaining for example comic or novel. Typically the Building Cross-Platform Apps using Titanium, Alloy, and Appcelerator Cloud Services is kind of book which is giving the reader erratic experience.

Haley Thacker:

As a student exactly feel bored for you to reading. If their teacher asked them to go to the library as well as to make summary for some guide, they are complained. Just minor students that has reading's spirit or real their leisure activity. They just do what the professor want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that examining is not important, boring and also can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Building Cross-Platform Apps using Titanium, Alloy, and Appcelerator Cloud Services can make you sense more interested to read.
