The SAGE Handbook of Multilevel Modeling From SAGE Publications Ltd

In this important new Handbook, the editors have gathered together a range of leading contributors to introduce the theory and practice of multilevel modeling.

The Handbook establishes the connections in multilevel modeling, bringing together leading experts from around the world to provide a roadmap for applied researchers linking theory and practice, as well as a unique arsenal of state-of-the-art tools. It forges vital connections that cross traditional disciplinary divides and introduces best practice in the field.

- Part I establishes the framework for estimation and inference, including chapters dedicated to notation, model selection, fixed and random effects, and causal inference.
- Part II develops variations and extensions, such as nonlinear, semiparametric and latent class models.
- Part III includes discussion of missing data and robust methods, assessment of fit and software.
- Part IV consists of exemplary modeling and data analyses written by methodologists working in specific disciplines.

Combining practical pieces with overviews of the field, this Handbook is essential reading for any student or researcher looking to apply multilevel techniques in their own research.

Editorial Review

Review

...This handbook attempts to cover an intricate and multifaceted topic and delivers what is expected of it very successfully and at good cost considering its all-purpose usefulness. This handbook is a must-have consultation book for researchers interested in multilevel modelling from a wide variety of disciplines, if not all. (Patricia Troncosco, Cathie Marsh Institute for Social Research, The University of Manchester)

About the Author

Jeffrey S. Simonoff is Professor of Statistics at the NYU Stern School of Business. He is a Fellow of the American Statistical Association, a Fellow of the Institute of Mathematical Statistics, and an Elected Member of the International Statistical Institute. He is author or coauthor of roughly 100 articles and five books on the theory and applications of statistics.

Brian D. Marx is a Professor of Statistics at Louisiana State University. His main research interests include smoothing, ill-conditioned regression problems, high-dimensional chemometric applications; and he has numerous publications on these topics. He is past president of the *Statistical Modelling Society*, and is currently member of the Executive Committee of this same international professional society. He is coauthor of the book *Regression: Models, Methods, and Applications*, as well as, the co-editor of the *Sage Handbook on Multilevel Modelling*.

Users Review

From reader reviews:

Crystal Scott:

Reading a reserve tends to be new life style in this particular era globalization. With reading you can get a lot of information that will give you benefit in your life. Along with book everyone in this world can easily share their idea. Guides can also inspire a lot of people. Lots of author can inspire their reader with their story or even their experience. Not only the storyplot that share in the guides. But also they write about advantage about something that you need example of this. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors these days always try to improve their skill in writing, they also doing some investigation before they write to the book. One of them is this The SAGE Handbook of Multilevel Modeling.

Adam Schneider:

This The SAGE Handbook of Multilevel Modeling is great book for you because the content that is full of information for you who always deal with world and get to make decision every minute. This book reveal it data accurately using great manage word or we can say no rambling sentences inside it. So if you are read the idea hurriedly you can have whole information in it. Doesn't mean it only provides you with straight forward sentences but tough core information with splendid delivering sentences. Having The SAGE Handbook of Multilevel Modeling in your hand like keeping the world in your arm, information in it is not ridiculous 1. We can say that no reserve that offer you world in ten or fifteen second right but this book already do that.

So , this is certainly good reading book. Hello Mr. and Mrs. occupied do you still doubt which?

Maria Levine:

Reading a book being new life style in this calendar year; every people loves to examine a book. When you examine a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, due to the fact book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your review, you can read education books, but if you act like you want to entertain yourself read a fiction books, these us novel, comics, as well as soon. The The SAGE Handbook of Multilevel Modeling provide you with new experience in looking at a book.

Michael Gage:

This The SAGE Handbook of Multilevel Modeling is fresh way for you who has attention to look for some information as it relief your hunger associated with. Getting deeper you in it getting knowledge more you know otherwise you who still having little digest in reading this The SAGE Handbook of Multilevel Modeling can be the light food for yourself because the information inside this particular book is easy to get by simply anyone. These books create itself in the form which can be reachable by anyone, sure I mean in the e-book type. People who think that in book form make them feel drowsy even dizzy this publication is the answer. So there is no in reading a publication especially this one. You can find actually looking for. It should be here for anyone. So , don't miss the item! Just read this e-book kind for your better life as well as knowledge.
